

ABSTRACT OF THE DISCLOSURE

A cigarette comprises a tobacco section including  
a columnar tobacco filler material and at least one  
cellulose-based wrapping paper sheet for wrapping the  
5 outer circumferential surface of the columnar tobacco  
filler material. The outermost wrapping paper sheet  
among the wrapping paper sheets has a thermal  
conductivity not lower than  $0.5 \text{ W} \cdot \text{K}^{-1} \cdot \text{m}^{-1}$ .
